

Mariam Sharaf

Software Engineer | Full-Stack Developer

Bahraini | +973-36979770 | maryamshaider25@gmail.com | [Linkedin](#) | [GitHub](#) | [Portfolio](#)

PROFILE

A versatile Software Engineer with hands-on experience building scalable web applications, interactive 3D simulations, and mobile solutions. Proficient across the .NET ecosystem, modern JavaScript frameworks, and Unity C# programming. Proven ability to collaborate in agile teams, design clean MVC architectures, and deliver user-focused digital experiences from backend systems to front-end application logic.

HIGHLIGHTED SKILLS

- **Programming Languages:** JavaScript | CSS | HTML | Java | Python | C# | Swift
 - **Databases:** MySQL | MongoDB | PostgreSQL | Firebase
 - **Frameworks and Libraries:** React | Django | Express.js | Node.js | EJS | ASP.NET
 - **Tools:** Git | GitHub | Microsoft Office | Cloudinary | Unity | Postman | REST APIs | Xcode
 - **Soft Skills:** Time Management | Team Collaboration | Problem Solving | Critical Thinking
 - **Languages:** Arabic (Native), English (Fluent)
-

SOFTWARE ENGINEERING EXPERIENCE

Software Engineering Immersive Fellow, General Assembly, Bahrain

Jun 2025 - Sep 2025

Projects:

- Built Whack a Cat, a browser game with dynamic scoring and real-time feedback using vanilla JavaScript, CSS, and HTML
 - Built Just Do, a full-stack task manager with user authentication and CRUD operations using Node.js, Express, MongoDB, and EJS
 - Developed BrewViews, a full-stack cafe review platform featuring user authentication, photo uploads, and dynamic content management using React, MongoDB, Node.js, Express, Cloudinary, and JWT
 - Engineered Horizon, a travel-focused web application enabling users to share posts and interact with content in real-time using Python, Django, PostgreSQL, AJAX, jQuery, CSS, and Cloudinary
-

EDUCATION

- **Bsc. Computer Programming**, Polytechnic Bahrain, Bahrain **Exp. Jan 2027**
 - **Software Engineering Immersive Program**, General Assembly, Bahrain **Sep 2025**
-

PROJECTS

- Built Oops, No Evidence, a 4-player co-op stealth-cleanup game in Unity using C#, featuring physics-based environmental interactions
- Developed Tkaffal, a native iOS mobile application using Swift, Storyboards, and Firebase, featuring secure user authentication and a real-time Firestore database to connect donors with local NGOs.
- Architected Course Management, a full-stack training and certification web application using ASP.NET Core, EF Core, and MVC architecture, securing relational data schemas and deploying via Microsoft Azure.
